

PHP 5.3

Assessment Fact Sheet

Overview

The PHP 5.3 test measures knowledge of scripting in PHP Hypertext Preprocessor 5.3. This test is designed for programmers.

Job Family/Title	Programmers/Web Developers
------------------	----------------------------

Details

Average Testing Time (minutes)	37 minutes
Allowed Time (minutes)	90 minutes
Maximum Number of Questions	30 questions
Number of Sitzings	One
Designed for Unproctored Environment	Yes
Question Format	Multiple Choice – Adaptive
Product Category	Information Technology

Knowledge, Skills, Abilities and Competencies Measured

The following areas are covered:

- Communication Functions
- Databases
- General Functions
- HTML
- Language Functions
- Language Structure
- Object Oriented PHP

Example Questions

Question Time Remaining: 0h : 2m : 54s

```
CREATE TABLE Table3 AS SELECT * FROM Table1 UNION SELECT * FROM Table2;
```

Based on the sample code above, what is the result?

- a** ☐ It creates a new table "Table3" having values of "Table1" and "Table2" where "Table1" and "Table2" primary keys are matched.
- b** ☐ It creates a new table "Table3" having all values of "Table1" and "Table2."
- c** ☐ It creates a new table "Table3" having only distinct values.
- d** ☐ It always produces a SQL error.
- e** ☐ It creates a new table "Table3" having values of "Table1" and "Table2" where "Table1" and "Table2" primary and unique keys are matched.

Example Reports

Test: PHP 5.3
This report is confidential and its contents are intended to assist in the prediction of an applicant's work behavior. If you would like more information about this interpretive report or other products that SHL offers, please contact your account representative.

Score: 1.99
Proficiency Level: Basic (1.51 - 2.50)
The candidate demonstrates an understanding of basic concepts of PHP 5.3, including:

- HTML
- Communication Functions

The candidate may be proficient with intermediate PHP 5.3 concepts, such as:

- Language Functions
- Language Structure
- Databases

The candidate will likely be challenged by more advanced PHP 5.3 concepts such as:

- General Functions
- Object Oriented PHP

Candidates scoring at the Basic level would benefit from formal training or self study in order to become more effective in PHP 5.3.

Percentile Comparisons
The percentile score indicates how well the candidate scored relative to other candidates in the comparison population indicated by the score.

	Low	Medium	High
Global Population	30	70	100

Percentile 0

Order	Question	Topic	Description	Skill Level	Time Taken (Seconds)	Is Correct	A	B	C	Theta	Info	Stand Error
1	PHP_53_BB_0556	Databases	Connections	Intermediate	17.8	No						
2	PHP_53_BB_0330	Language Functions	Strings	Intermediate	21.5	No						
3	PHP_53_BB_0515	Communication Functions	FTP	Basic	9.6	No
