SHL Verify Reading Comprehension Test

Assessment Fact Sheet

Overview	The Verify Reading Comprehension test measures a candidate's ability to read and understand written materials and is useful for assessment at a range of job levels. This ability is very important wherever candidates will be expected to read, understand and follow instructions, or use written materials in the practical completion of their job.
	The task involves reading a passage of text, and answering a short written question. An effort has been made to ensure the text passages and resulting questions are relevant to as wide a range of industries and roles as possible. The content of the test makes no assumptions about prior knowledge, with applicants directed to use only the information in the passage to derive their answer.
